Not illustrated. 1877 Excerpt: . . . of the preceding year; in the present year the rate of the Poona Division, is much lower than that of either of the others, but in a comparison the small number of observations deprives tjais result of any particular value. Diseases of the Respiratory System. --Compared with the preceding year there is a reduction iu the rate of admissions for each of the Divisions, and also for Depots; as in 1875 the rate for the Mhow Division exceeds that of either of the others. Bombay. Diseases of the Digestive System. --The rate of admissions of the Presidency Division is 486 per 1, 000 men, and that of the Poona is 58-lower than in the preceding year; on the other hand the rate of the Mhow Division is 27-and that of Depots is 204 per 1, 000 men higher. In the Poona Division, with a lower admission,...

### Reviews

*This book is definitely worth acquiring. I have go through and so i am certain that i will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after i finished reading this publication in which actually altered me, change the way in my opinion.*
