GRIN Verlag Gmbh Mai 2014, 2014. Taschenbuch. Book Condition: Neu. 211x9x8 mm. Neuware - Master's Thesis from the year 2008 in the subject Agrarian Studies, grade: 7.31, Junagadh Agricultural University (College of Agriculture), course: Farm Power and Machinery, language: English, comment: Our department conducted the project titled ' Modification and Evaluation of Agricultural Residues Shredder' on above developed Shredder and committee released the same machine during 2007-08. , abstract: It is seen that large quantities of agricultural crop residues are being wasted. A major disadvantage of most recyclable waste is their bulk i.e. it requires a large space for accommodation. It has been observed by bio-scientists that if the waste is burnt, this affects the soil microflora, results in loss of nitrogen and organic matter. Most bulky residues need some type of pre-incorporated physical processing or shredding to facilitate their rapid decomposition and mixing with the soil. It has been an established fact that finer particles (4 to 5 cm) decompose faster as compared to large particles. Shredder is ideal for disposal of course leaves, garden and agricultural wastes. Such as twinges, small branches, flower stalks straw, tree pruning etc. This scientific way returns the nutrients back to the soil in natural ways. Therefore the efforts must be concentrated towards effective utilization of all the wastes. Serious efforts in this direction provide rich dividends to the farmers as well as solve the disposal problems, minimize pollution effects, open up evens for starting rural industries and self-employment or gainful employment for rural youth. It is more relevant way to avoid migration of youth from villages to the urban area in search of employment. Despite their potential economic uses, the valuable natural resources have remained, more or less commercially unexploited. If the technologies developed are properly adopted particularly in the rural area of...
